

# Your Server is a Lambda!

**AWS API Gateway**

**AWS Lambda**

**HTTP4K**

# serverless4k?

```
package org.http4k.example
```

```
import org.http4k.aws.lambda.AppLoader
import org.http4k.core.HttpHandler
import org.http4k.core.Request
import org.http4k.core.Response
import org.http4k.core.Status.Companion.OK
```

```
object TweetEcho : AppLoader {
    override fun invoke(env: Map<String, String>): HttpHandler =
        { req: Request ->
            Response(OK).body(req.bodyString().take(140))
        }
}
```

Proguard shrinks this lambda uberJAR to <400kb
